December 13 Annual Membership and Program Meeting

Bird Identification Lecture and Slide Show in Preparation for the Christmas Bird Count

Board member and retired wildlife biologist Ron Walker and amateur wildlife photographer Dr. Tom Dove will join forces to give a presentation on common (and uncommon) birds found in Hawai'i. This is will be a perfect opportunity to brush up on your avian identification skills in time for the 105th Christmas Bird Count. Ron's knowledge is legendary, and Dr. Tom's photography is truly fantastic, so you won't want to miss this unique presentation.

The Christmas Bird Count began over a century ago when 27 conservationists in 25 localities changed the course of ornithological history. On Christmas Day 1900, the small group of conservationists participated in an alternative to the "side hunt," a Christmas day activity in which teams competed to see who could shoot the most birds and small mammals. Instead, Chapman proposed to identify, count, and record all the birds they saw, founding what is now considered to be the most significant citizen-based conservation effort and a more than century-old institution.

Christmas Bird Count information will be available at the Program Meeting. Program meetings are held from 7:30 to 9:30pm at Henry Hall Room 109 on the Chaminade University campus, 3140 Wai'alaue Avenue, Kaimuki. Holiday refreshments will be served, and HAS products will be available for purchase.

Christmas Bird Count 2004/2005

CBC began over a century ago when 27 conservationists in 25 localities changed the course of ornithological history. On Christmas Day 1900, the small group of conservationists participated in an alternative to the "side hunt," a Christmas day activity in which teams competed to see who could shoot the most birds and small mammals. Instead, Chapman proposed to identify, count, and record all the birds they saw, founding what is now considered to be the most significant citizen-based conservation effort and a more than century-old institution.

Today, over 55,000 volunteers from all 50 states, every Canadian province, parts of Central and South America, Bermuda, the West Indies, and Pacific islands count and record every individual bird and bird species seen in a specified area. During the 103rd count, about 73 million birds were counted. Last year again saw a record high – this time, 1,981 individual counts. Each count group completes a census of the birds found during one 24-hour period between December 14 and January 5 in a designated circle 15 miles in diameter-about 177 square miles.

Apart from its attraction as a social and competitive event, CBC reveals valuable scientific data. Now in its 104th year, CBC is larger than ever, expanding its geographical range and accumulating information about the winter distributions of various birds, and it is vital in monitoring the status of resident and migratory birds across the Western Hemisphere. The data, 100% volunteer generated, have become a crucial part of the U. S. Government's natural history monitoring database. Articles published in the 103rd CBC issue of *American Birds* helped ornithologists better understand the magnitude of the effects of West Nile virus on regional bird populations. In addition, count results from 1900 to the present are available through National Audubon's website www.audubon.org/bird/cbc.

Join our Christmas Bird Counts during the official count period from December 14, 2004 to January 5, 2005. If you want to do something good for birds and meet other "bird people," contact one of the coordinators to sign up. There is a \$5.00 charge per person to support compiling and publication of the nationwide results. Contact the individual count coordinators listed below to participate.

What Kine Manu? (*manu is Hawaiian for bird*)

Announcing our bird contest, "What Kine Manu" - guess what the bird above is, and win a set of Voices of Hawaii's Birds cassette tapes. Send in your answer by email, mail, or phone. First correct answer received by each method wins a set of tapes. Good luck!

February 21 Program Meeting (in a new location) - Whales!

Christine Brammer will present of an overview of the National Marine Sanctuary Program with an emphasis on the Hawaiian Islands Humpback Whale National Marine Sanctuary. Included in the presentation will be information on participating in the annual Sanctuary Ocean Count.

Christine is the O'ahu Programs Coordinator for the Hawaiian Islands Humpback Whale National Marine Sanctuary. She has been working for the Sanctuary for about five years now. Christine is the coordinator for the annual statewide Sanctuary Ocean Count and she also manages the other Sanctuary efforts on O'ahu as well as assists with efforts on the Big Island.

In addition to education and outreach Christine maintains the Sanctuary's website, and does graphic and display design. Her primary interest is in preserving Hawai'i's precious marine environment.

IMPORTANT: the location for our Program Meetings has changed. They will now be held at the University of Hawai'i's St. John Lab (Botany Building) in the ground

floor auditorium at 3190 Maile Way, where it intersects East-West Road. The main entrance to the building is at ground level, street side (Hint: the Diamond head side stairs do not lead to the auditorium). Program meetings will also have a new time, running from 6:30pm to 8:30pm.

**Give Hawai'i's Birds
a Happy New Year**

KEEPING CATS INDOORS ISN'T *JUST FOR THE BIRDS!*

Indoor cats are safer, healthier and live longer than free roaming cats. Millions of outdoor cats kill hundreds of millions of birds and other wildlife in the U.S. each year.

Protect cats, birds and other wildlife by keeping cats indoors!

For more information, contact:

Federal Junior Duck Stamp Design Contest

The Federal Junior Duck Stamp is only \$5 and makes a beautiful collector's item. Call toll free, 1-888-534-0400 today to order a Federal Junior Duck Stamp. All proceeds from the sale of this stamp go right back into the program.

For information on the Federal Duck Stamp Contest for adults, call (202) 208-4354 or visit the FWS web site at <http://pacificislands.fws.gov>

About the Contest:

The Federal Junior Duck Stamp Contest (FJDSC), based on the adult Federal Duck Stamp Contest, was established in 1990 to use art to promote greater awareness of our nation's living resources. Students are encouraged to learn about the habitat and behavior of their favorite waterfowl as they sketch their entry for the contest.

Hawai'i joined this program in 1996, allowing keiki (children) from all around the islands to participate in this wonderful educational experience. This annual contest is open to all private, public and home schooled students from kindergarten through high school.

Each fall, all public and private schools in the U.S. receive an informational package on this program. If you are home schooled and would like to participate, please give us a call.

How to Enter:

The entry must be a horizontal drawing or painting 9 inches high and 12 inches wide, and not exceeding 1/4 inch in thickness.

Entries must not be framed, under glass, or have a protective covering that is attached to the entry. You may choose the medium of your entry and it may be either multicolor or black and white. Entries must be handdrawn - electronically or mechanically generated art will not be accepted. Only one entry per person is allowed.

Entries are divided into four grade groups (K-3, 4-6, 7-9, 10-12). Three first, second, and third place winners, and 16 honorable mentions are chosen from each group. The State Best of Show is chosen from the first place winners.

Contest deadline is March 15.

For complete contest regulations and application, please contact your state coordinator.

Helpful hints:

- use bright, bold, and warm colors
- make sure the habitat and anatomy are correct
- keep it simple, remember, it is a STAMP design

Species permitted in the Federal Junior Duck Stamp Contest:

American Black Duck	Hooded Merganser
American Wigeon	King Eider
Black-bellied Whistling Duck	Laysan Duck
Black Scoter	Lesser Scaup
Blue-winged Teal	Mallard
Brant	Mottled Duck
Bufflehead	Northern Pintail
Canada Goose	Northern Shoveler
Canvas Back	Oldsquaw
Cinnamon Teal	Red-breasted Merganser
Common Eider	Redhead
Common Goldeneye	Ring-necked Duck
Common Merganser	Ross Goose
Emperor Goose	Ruddy Duck
Fulvous Whistling Duck	Snow Goose
Gadwall	Spectacled Eider
Greater Scaup	Steller's Edier
Greater White-fronted Goose	Surf Scoter
Green-winged Teal	Trumpeter Swan
Harlequin Duck	Tundra Swan
Hawaiian Duck / Koloa	White-winged Scoter
Hawaiian Goose / Nene	Wood Duck

Sponsors:

Ducks Unlimited, Western Region donates a beautiful wood duck carving as the Grand Prize.

Mahalo for supporting the Hawaii Federal Junior Duck Stamp Design Contest and contributing to environmental education in the community.

We need your help:

The success of this program is solely made possible by individuals and organizations in the community donating their time and contributions. Prizes, publicity, and suggestions are greatly appreciated and welcomed. Every bit counts toward putting a smile on a participant's face.
